# Cutting-edge science in the field of neuromodulation

The 3rd Joint Congress of the INS European Chapters (e-INS 2023) will offer you a unique chance to meet and network with a diverse, multidisciplinary international community of neuromodulation specialists, basic scientists, biomedical engineers, and members of our industry.

From acquiring a global perspective of the current state of neuromodulation to learning new best practices, and world-class networking opportunities, e-INS 2023 provides cutting-edge knowledge and connections that will transform not only your career but the field internationally.

- This is about passion. This is about science and technology. This is about patients.
- It is about friendship. It is about a community.
- You make the difference your contribution, your participation, your energy. You, yourself!

## Why Attend

The 3<sup>rd</sup> Joint Congress of the INS European Chapters (e-INS 2023) will offer you a unique chance to meet and network with a diverse, multidisciplinary international community of neuromodulation specialists, basic scientists, biomedical engineers, and members of our industry.

From acquiring a global perspective of the current state of neuromodulation to learning new best practices, and world-class networking opportunities, e-INS 2023 provides cutting-edge knowledge and connections that will transform not only your career but the field internationally.

This is about passion. This is about science and technology. This is about patients.

- It is about friendship. It is about a community.
- You make the difference your contribution, your participation, your energy. You, yourself!

**Save the date** for e-INS 2023 in your calendar! Invite your colleagues and join us for what promises to be a fantastic time in Hamburg, next August.

New memories are waiting to be made!

## Participants Feedback

# Of e-INS 2021 Participants Surveyed

agreed the quality of the scientific content and faculty were excellent

96%

agreed that there were good opportunities for networking & collaboration

95%

agreed that participating in e-INS 2021 advanced their career

93%

### New interesting science!

As a resident of neurosurgery, I was able to discover this new and exciting world which is neuromodulation sciences. I would gladly dive into that speciality and I'm looking forward to participating the next event of INS!

### Awesome for Early-career professionals!

Very instructional for beginners/resident like myself! I was able to discover new areas of neuromodulation application I never knew existed.

#### Cutting-edge science!

Excellent high-quality scientific and educational content from top professionals in our field!

#### I love networking at the INS congresses!

There were very good opportunities for networking & collaboration with colleagues from around the world!
