

# Abstract Topics

**Take the opportunity to present your work at e-INS 2023, share it with the world, contribute to our field, and leave your mark of innovation on the future of neuromodulation.**

**Discover the list of Abstract Topics and get inspired to contribute to the educational and scientific content of e-INS 2023:**

- Basic Science
- Neuroprosthetics and Neural Engineering
- Socioeconomics
- Movement Disorders
- Psychiatric Disorders/Cognitive Disorders
- Central Pain
- Pain persistent spinal pain syndrome (Type I and II)
- Spasticity and Movement Disorders
- Headache
  
- Peripheral Neuropathies
- Cardiovascular Disorders
- Gastrointestinal and Genitourinary Disorders
- Non- and Less-Invasive Brain Stimulation
- Neuro-regeneration
- Digitalisation and AI in Neuromodulation
- Databases and Registries
- *Late-Breaking Research\**
- Other

Submit an abstract of your latest scientific research under one of these topics and get a spotlight on your work! All submitted abstracts have the chance to be part of the e-INS 2023 [Abstract Competition](#). The six best will be awarded the

prize – Free registration to the [INS 2024 World Congress](#)!

*\*Do you have some innovative research still in the pipeline?  
If so, submit your abstract as Late-Breaking Research. Share  
your preliminary work and update with your results and  
conclusions, at a later stage!*
